- Synchronize data securely to MFB on home PC (optional)

Result: improved cockpit dynamics

Management Benefits

- User managed document libraries
- Drag and drop file management tools
-expert training & knowledge not required
- Automatic translation to PDF format with security applied (optional)
- OBDS Focus™** Subscription updates for external documents
- Distribution & Deployment Audit Trail
- Revision management and configuration control
- Full and transparent regulatory compliance
- Dedicated OBDS support team

Result: fleet synchronization and standardization

Who is OBDS?

Since 1991 On-Board Data Systems (OBDS) has been setting the standard for the management of Electronic Checklists and flight data.

OBDS pioneered the use of **MFD Electronic Checklists** as a tabulated data retrieval system **EPADs®**, and continues to make inspired advances in pilot-friendly solutions.

MFB™

Multi-Function FlightData Browser™ Cockpit Task Management and Data Distribution Services

- Hierarchical, Secure Document Management
- Assemble, Index and Publish updates from Fleet Manager Site

Designed for the Fleet Manager - to save time and effort

Key components that work together for a total EFB solution:

- EFB PILOT USER INTERFACE (MFB™ shell program)
- WEB-BASED CONTENT MANAGEMENT TOOLS
- DATA AND SOFTWARE SYNCHRONIZATION

A Scalable and Modular design for easy system integration

MFB™ is Compatible with ALL Class 1 and Class II Electronic FlightBags

Added Bonus:

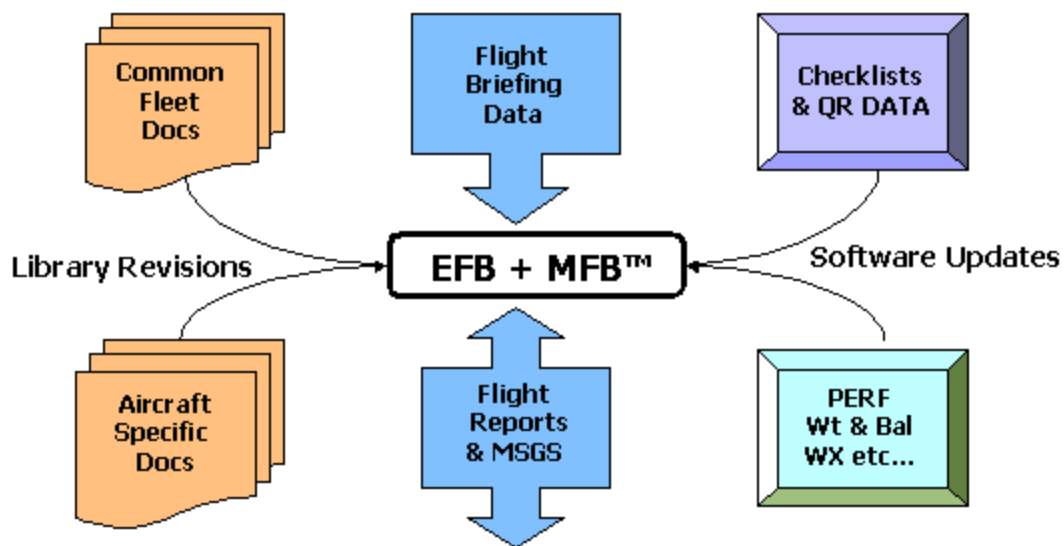

OBDS also interfaces with EFIS systems for **Electronic Checklist (ECL)** as a (fully functional) backup of the ECL in the MFB system.

OBDS is licensed by both **HONEYWELL** and **COLLINS** to support Electronic Checklist Content
